Message from the Trustees

For most members, the College Pension Plan is central to their retirement plans. As trustees of the pension plan, we take pride in being part of that legacy.

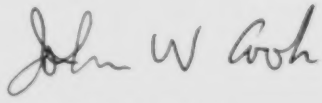
The College Pension Plan is a defined benefit pension plan. Your basic, guaranteed pension benefit is based on your pensionable service, your five-year highest average salary and your age at retirement. For plan members, this means that your pension is predictable and not based on economic conditions during your working lifetime or at the time of your retirement. For employers, the plan provides a powerful attraction and retention tool to keep top instructors in the province for the benefit of all British Columbians.

The plan is managed by the board of trustees, which represents plan members and plan employers. Joint-trusteeship gives you a strong and active voice in your pension plan—and your future. The board is composed of 12 members: 11 members, including one alternate member, chosen by the plan member and employer partners; and the board chair who is appointed by the trustees.

Our Benefits, Communications, and Interplan Investment committees continue to focus on the long-term health and viability of the plan and on keeping you informed of its benefits. The Audit Committee maintains the integrity of our internal and external financial reporting, and helps in meeting our responsibilities as financial administrators of the pension plan.

We support the standards of good governance as set by the Canadian pension industry. We are guided in our work by our funding policy and our communications policy, and we continue to measure our achievements against the guidelines established by the Canadian Association of Pension Supervisory Authorities, a national association that encourages efficient and effective pension regulation in Canada.

Our goals remain the long-term financial health of the pension plan and delivering high standards of service to plan members and employers. It is our pleasure to continue to work on your behalf, and it is with pride that we present the College Pension Plan Annual Report for the fiscal year ending August 31, 2006.



John W. Cook, Chair

Arlene Paton	Provincial Government
Dominique Roelants	Federation of Post-Secondary Educators of B.C.
John Wilson	Federation of Post-Secondary Educators of B.C.

Partners, Trustees and Agents

The College Pension Plan is jointly trusteed, with four plan partners, and is governed by a joint trust arrangement. The College Pension Plan partners are the B.C. Government and Service Employees' Union (BCGEU), the Federation of Post-Secondary Educators of BC (FPSE), the Post Secondary Employers' Association (PSEA) and the provincial government. The partners are responsible for appointing the trustees.

The College Pension Board of Trustees (the board) is fully responsible for the management of the pension plan, including the investment of the assets and the administration of the plan. The board may amend the pension plan rules as long as changes can be funded by pension fund surpluses or are cost-neutral to the plan. Plan rule changes that result in contribution rate increases must be approved by the partners. If the actuary determines that it is necessary to increase contribution rates, the trustees must increase employer and member contribution rates equally.

The British Columbia Pension Corporation provides benefit administration services as an agent of the board. The corporation enrols members, collects contributions, processes benefits and issues pension payments.

The British Columbia Investment Management Corporation (bcIMC) provides investment management services as an agent of the board. The bcIMC is one of the largest institutional investors in the country, offering a wide range of fund management services.

Member Services and Communications

Communicating with plan members is a priority of the board. Guidelines have been developed to ensure all plan information is easy to understand and easy to use. By practising plain language principles and focus testing, we continue to improve the effectiveness of our communication products.

New and updated communications materials are regularly published, and new online products and services are continually being developed. The plan produces:

- annual member's benefit statements
- the annual report
- an annual Report to Members for active members
- PensionFacts—a series of fact sheets
- retirement information packages
- *After Work* (formerly PensionNews)—a newsletter for retired members that is published twice a year
- forms
- bulletins.

In addition, our website provides excellent pension plan information and online estimators at **college.pensionsbc.ca**.

The board recognizes the above could not be accomplished without the strong team of professional staff at the Pension Corporation.

Performance Measures and Targets

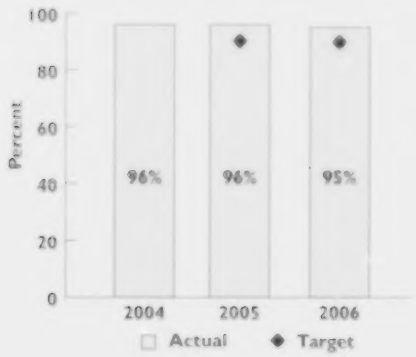
April 1, 2005 to March 31, 2006

The College Pension Plan is dedicated to providing quality and cost-effective services to plan members. Our administrative agent, the Pension Corporation, made impressive gains in service improvements and efficiencies, including improving client response time. The board approves service standards for the plan, including client satisfaction and timeliness of response, and monitors performance against those standards.

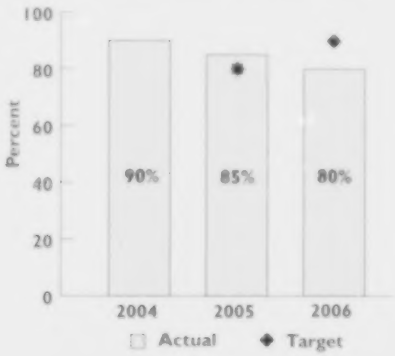
Regular surveys of plan members show that both active and retired members give the Pension Corporation a high satisfaction rating for service quality.

Satisfaction for the year ended March 31

Recently Retired Members*



Longer-term Retired Members



Active Members

*Recently retired members were surveyed about their retirement experience.

As the following graphs indicate, the plan has significantly improved service response over the past three years, while also handling significant demand.

Annual service results are for the 12 months ending March 31, 2006 based on the board's agreement with the Pension Corporation.

Service for the year ended March 31

Plan Participants

Members

Members of the College Pension Plan are senior administrators and faculty members of British Columbia post-secondary institutions. For employees hired on or after September 1, 1999, all full-time and some part-time senior administrators and faculty members are required to participate; certain part-time employees may do so voluntarily.

There are three categories of members in the plan:

- Active—those currently contributing, or on an approved leave of absence, receiving benefits from an approved group disability plan, or who have already accrued 35 years of pensionable service.
- Inactive—those who terminate employment, but whose contributions remain on deposit with the plan.
- Retired—those who are receiving a pension, including those who are receiving a disability pension.

The number of active plan members increased 0.3% and the number of retired members increased 11% from last year. The plan now serves 17,013 members, including 10,678 active plan members and 3,200 retired members.

Number of Members

**The University College of the Cariboo became Thompson Rivers University in April 2005.

Plan Benefits

Plan benefits are established by the pension plan rules made under the authority of the joint trust arrangement. The following is a general description of plan benefit rules.

Guaranteed Basic Pension

The College Pension Plan is a defined benefit plan. Your basic, guaranteed pension benefit is based on how many pensionable years you were an active member, the average of your five highest years of salary (not necessarily your last five years) and your age at retirement. Your pension is not based on how much you contributed to the plan, nor is it based on the investment performance of the plan's assets. The advantage of a defined benefit plan is that your pension is predictable. The plan provides entitlement to a pension benefit for all plan members after having reached a qualifying age. The plan also provides survivor and disability benefits.

Members are eligible for unreduced pension benefits:

- at age 65, or
- at age 60, with at least two years of contributory service, or
- at age 55 or older, with at least 35 years of contributory service.

Other retiring members have an early retirement reduction applied to their pensions.

For members who terminate employment on or after January 1, 2002, the plan provides a benefit of 1.7% of pensionable earnings, up to the Canada Pension Plan Year's Maximum Pensionable Earnings (YMPE), and 2% of pensionable earnings over the YMPE (to a maximum of 35 years) for each year of pensionable service.

If a member retires before age 65, their pension from the College Pension Plan will include a temporary monthly payment called a bridge benefit. The bridge benefit is intended to "bridge" the gap between income before age 65 and income after age 65, when Canada Pension Plan benefits typically begin. The bridge benefit is 0.3% of the lesser of the YMPE or the member's highest average salary for each year of pensionable service.

Indexing (non-guaranteed)

Indexing is a non-guaranteed cost-of-living supplement to the basic pension. It is paid only to the extent that there is sufficient money in the inflation adjustment account (IAA), which is funded by member and employer IAA contributions to the plan.

On January 1, 2006, retired members received a full Consumer Price Index (CPI) increase of 3.4% (2005: 1.8%). Inflation increases to the pension may be provided each year based on changes in the CPI (See Note 7b to the financial statements). Indexing, once granted, becomes guaranteed. The board monitors the plan's ability to continue to provide full indexing.

Group Benefits (non-pension)

Group benefits (dental and extended health) are not guaranteed. They are subsidized by a limited portion of available annual employer contributions that would otherwise go to the IAA. The board monitors the plan's ability to continue to provide non-guaranteed group benefits.

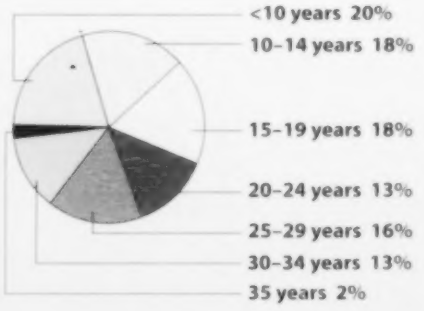
Percentage of New Regular Pensions, by Years of Service



Termination and Refund Benefits

A terminating member who is eligible for a pension but has not yet reached the earliest retirement age may choose:

- a deferred pension, or
- a transfer of the commuted value of the pension benefit (the minimum value is the member's contributions with interest) to a locked-in registered retirement savings plan or a similar tax-sheltered plan.

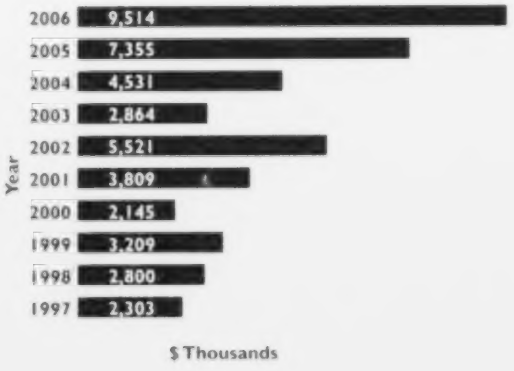
If a member is under 60 with less than two years of contributory service, they may also choose a refund of contributions with interest.

Interest compounds annually and is credited to the member's contribution balance. The balance (including interest) is included in the annual Member's Benefit Statement. The rate of interest is governed by the applicable pension legislation and is based on average bank five-year personal term deposit rates (2006—2.72%; 2005—2.58%).

The number and value of termination benefits paid can vary from year to year, depending on the employment environment, the type of benefit paid, and the plan member's entitlement. In the year ended August 31, 2006, the number and value of termination and refund benefits paid increased significantly compared to 2005.

Number of Termination and Refund Benefits Paid

Value of Termination and Refund Benefits Paid



Termination and refund benefits paid include refunds of contributions and commuted value payments; deferred pensions are included in pension statistics.

Transferring Service

Transfer agreements allow pension plan members to carry pension rights from one plan to another. Members may carry their years of pensionable service and contributions to a new plan at a different place of employment if the new plan has an agreement with the College Pension Plan. Employers that allow pension plan members to transfer their pension rights to other pension plans are called "reciprocal employers." In order to transfer service the member must have left their contributions on deposit, or reinstated service. Service may not always be transferred on a one-to-one basis, but depends on differences in plan benefits. Members of the plan who have made contributions to another pension plan may want to inquire about transfer agreements.

Under the *BC Public Sector Pension Transfer Agreement* of April 1, 2004, transfers can be made between the plan and the other BC public sector plans (Municipal, Public Service, Teachers'), and other signatories. In June 2004 the board entered into the *National Public Service Pension Transfer Agreement*, which allows transfers between a number of public service pension plans in Canada. The board no longer enters into bi-lateral reciprocal transfer agreements with other pension plans; any other plan wishing to establish reciprocity with the College Pension Plan should consider entering into the *National Public Service Pension Transfer Agreement*.

In the year ended 2006 there were 193 reciprocal transfers-in from other pension plans and 88 transfers-out. The transfers-in totalled $11.6 million; transfers-out totalled $2.4 million.

Purchase of Additional Service

Members of the plan may be able to increase their future pension benefits by purchasing service. Purchasing service means paying for periods of employment that have not already been counted as service with the plan. This service may include:

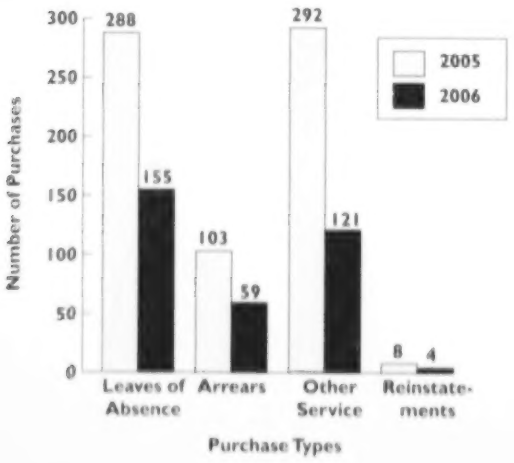
- leaves of absence (maternity, parental or other leave),
- arrears contributions (a period of time when members and employers did not make required contributions),
- other service (such as service before becoming a regular contributor), or
- reinstatements (contributions previously refunded from the plan).

Purchase of service rules have changed, and beginning April 1, 2007, members can only purchase periods of service that occurred during the previous five years. The member must apply to purchase prior to terminating employment. More information about purchasing service, including costs, is available on the plan website at **college.pensionsbc.ca**.

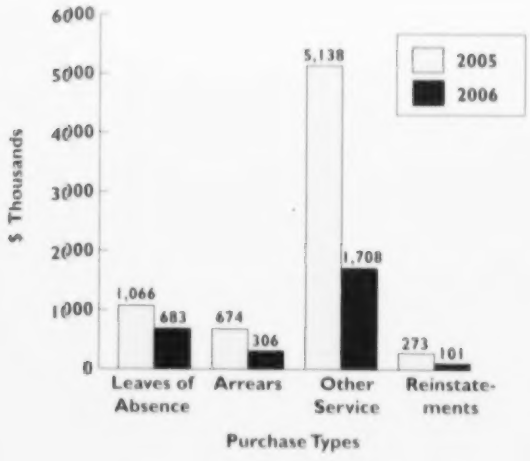
In the year ended August 31, 2006, the number of purchases of additional service decreased 51% from 2005. The value of the purchases decreased 61%.

Member and Employer Purchases of Additional Service

Number of Purchases



Value of Purchases



Contributions

Plan members contribute through automatic deductions from their salary. Both plan members and employers pay contributions to fund future pension benefits. Once a member terminates employment, retires, or reaches 35 years of pensionable service, they no longer contribute. The contribution rates in the table below are applied to pensionable salaries.

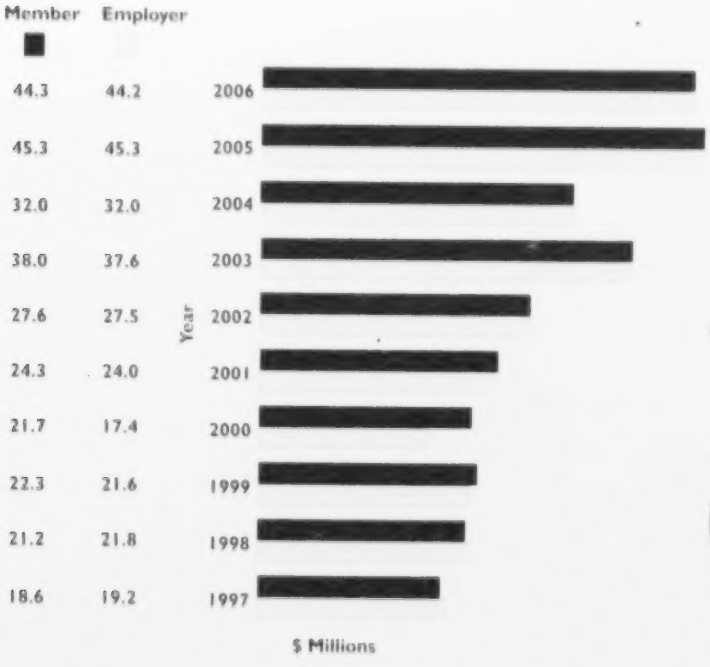
The Basic Account serves to pay the guaranteed (defined) pension benefit. The Inflation Adjustment Account (IAA) provides a non-guaranteed cost-of-living supplement to the extent that funds are sufficient.

The current rates for members and employers as at August 31, 2006 were as follows:

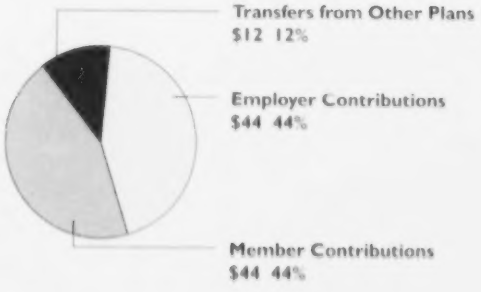
- 7.95% (includes 6.86% Basic Account, 1.09% IAA) of pensionable salary up to and including the YMPE,* and
- 8.70% (includes 7.61% Basic Account, 1.09% IAA) of pensionable salary for salary greater than the YMPE.*

* Year's Maximum Pensionable Earnings (YMPE) is the earnings limit on which you make Canada Pension Plan (CPP) contributions. The calendar year 2005 YMPE was $41,100, and was increased to $42,100 in 2006.

Contributions



Contribution Revenue



Investments

Market Review

One of the major roles of the College Pension Board of Trustees as fiduciary for the plan is the responsibility for overseeing the investment of more than $2 billion in assets for the long-term benefit of the plan members. The most important issue for any pension plan is long-term results, and the board's goal is to achieve consistent and steady performance over the longer term based on a disciplined approach and prudent decision-making.

The board reviews the Statement of Investment Policies and Procedures (SIPP) annually, approves the long-term asset mix policy for the investment of assets and oversees the management of those assets through the board's investment management agent, the British Columbia Investment Management Corporation (bcIMC). The board approved a revision of the SIPP in June 2006. Diversification of investments is a key principle in the investment policy. Investments are held in a range of asset types (bonds, equities, real estate), industry sectors, and global markets.

For the year ended August 31, 2006, the College Pension Plan investment portfolio earned a solid overall return on investment of 9.5% for the Basic Account.

Equity and real estate markets were strong for most of the year. Canadian markets increased due to rising prices for energy and other commodities. A month-long global equity market correction from May to June proved to be a temporary setback. Bonds provided modest returns to our diversified portfolio.

The largest contributions to returns came from real estate and decisions to hedge foreign currency investments. Real estate holdings earned 26.8%, far in excess of the benchmark of 6.1%. Non-North American equities generated 15.8%, below the benchmark return of 16.4%. Canadian equities gained 13.4%, also below the benchmark return of 15.6%. U.S. returns were 4.1%. Most of this gain came from hedging the U.S. dollar. (The "unhedged" benchmark return was a mere 1.5% as the U.S. dollar fell 6.9% against the Canadian dollar.) Fixed income returns ranged from 2.4% on Canadian bonds to 7.2% on construction mortgages.

The plan's Basic Account generated a 9.5% return on its investments, exceeding the benchmark return of 8.0%. Over the last five years, the return for the Basic Account was 7.6% annually, and the 10-year annualized rate of return was 8.8%, exceeding the benchmark return for both periods.

Looking ahead, the global economy appears to be in a mid-to-late cycle phase. Economic activity has slowed, a trend that will likely continue into 2007. Corporate profits remain strong but they will probably not continue growing as rapidly as they have over the last year. Housing activity in the U.S.

has slowed sharply, raising concerns about the possible impact on other economies.

This cycle is proving different from past cycles in a number of respects. In particular, there is ample availability of credit despite hikes in short-term interest rates by many central banks. Lower energy prices will help keep inflation in check. In this environment, returns are unlikely to be as strong as over the last year.

As always, the board will continue to work with our investment manager, bcIMC, to ensure that our assets are diversified and that they generate the returns needed at an appropriate level of risk to keep the plan properly funded.

Approved Investment Asset Mix

Strategic and short-term asset allocation targets are set within the ranges in the table below. Short-term debt for asset mix purposes includes government bonds with one- to five-year terms and money market funds.

Basic Account Investment Asset Mix and Performance
as at August 31, 2006

Asset Class	Approved Range (%)	Actual Assets (%)	Rate of Return (%)	Performance Benchmark*(%)

* Benchmarks are objective standards to compare against actual investment returns.
** Annual rate of return not applicable.

Investment Portfolio

Investments are stated at fair market value and consist primarily of direct ownership in units of pooled investment portfolios. The units of pooled investment portfolios are valued regularly based on the value of the underlying assets. In the table below, all portfolios are pooled except Real Return Bonds, which is directly held.

For further information on the investment portfolio, visit the British Columbia Investment Management Corporation website at www.bcimc.com

Audit Committee

The mandate of the Audit Committee is to act on behalf of and to assist the board to provide for:

- a timely and cost-effective system of accounting and reporting,
- financial statements conforming with generally accepted accounting principles,
- an independent audit of the financial statements, and
- an annual report with audited financial statements.

The committee accomplishes its mandate to provide financial oversight by:

- monitoring and reporting to the board on the integrity of reporting, internal controls, and compliance,
- monitoring and reporting on the independence and performance of the auditors,
- monitoring and reporting on risk management as it affects financial reporting,
- recommending the selection and compensation of external auditors, and
- addressing any matter referred to the committee by the board.

Membership on the committee includes two nominees from each of the boards of the College Pension Plan, the Municipal Pension Plan, the Public Service Pension Plan, and the Teachers' Pension Plan. All nominees must be ratified by all the boards. The committee must include at least two trustees who understand accounting principles (GAAP), internal controls, and audit committee functions. The committee must meet at least three times a year. In addition to providing financial oversight through monitoring and reporting, the committee also evaluates its own performance annually through an established procedure.

Financial Health

Actuarial Valuation

The College Pension Plan is financially sound. The fund holds a diversified portfolio of debt and equity investments that offer consistent and steady performance over the long term.

Every three years, an independent actuary assesses the financial health of the plan's Basic Account and determines whether contribution rates are adequate for funding the plan.

The next valuation report will be received by the College Pension Board of Trustees in late spring 2007. Preliminary analysis of the valuation data indicates that a contribution rate increase will likely be required, but it is expected to be smaller than the 2004 rate increase.

The most recent valuation report is now available on the website at **college.pensionsbc.ca**.

Latest Actuarial Valuation as at August 31, 2003

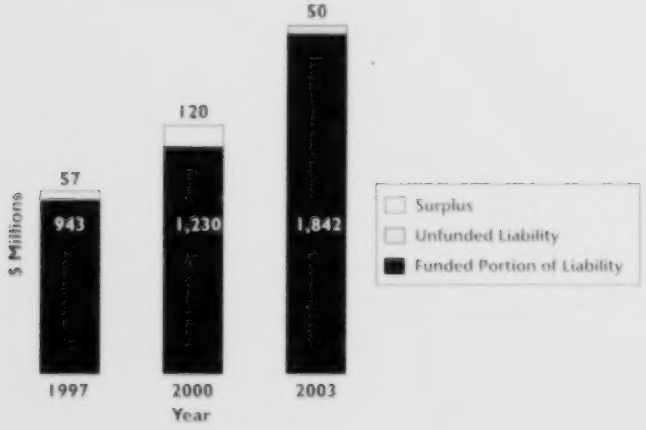
See Note 7 and 8 to the Financial Statements for additional explanation.

Funding of the Total Basic Benefit Liability



An unfunded liability means there is a shortfall between the amount needed to fund basic benefits and the assets available to pay for those benefits, whereas a surplus means there are more than enough funds to meet the basic benefits.

Funding Policy

Our goal is to ensure the financial health and stability of the pension plan now and in the future. We must make sure that the basic guaranteed pension benefit is funded in order to meet the pension promise for current and future retired members. We must also balance the funding available for inflation protection against the increasing cost of non-pension post-retirement group benefits. The funding policy sets guidelines and policies for the guaranteed basic pension benefits, inflation protection (not guaranteed) and non-pension benefits, and guides us in maintaining a balance between benefits and assets in the plan.

The intent of the policy is to provide fairness in costs and benefits to all plan members, regardless of your stage of plan membership, and to prevent sudden contribution rate increases in the future. While the policy reflects the intentions of the board, it is subject to restrictions imposed by the plan partners and must comply with relevant pension and tax rules.

If the plan has a shortfall between the guaranteed basic pension benefits promised and the assets available to pay for those benefits, the plan has an unfunded liability. In such cases, the funding policy directs us to increase contribution rates to eliminate the unfunded liability. If the plan has more than enough funds to pay the guaranteed basic pension benefits, the plan has a surplus. In such cases, we must use the surplus to ensure that contribution rates for employers and members remain stable for the long term. Other benefit improvements can then be considered.

Future inflation indexing and non-pension post-retirement group benefits are not part of the basic pension benefit, and are not guaranteed.

For inflation protection, the board's overall intent is to stabilize the inflation indexing for a long period of time. The board annually reviews the funding status of the Inflation Account, and if it appears that full indexing cannot be provided for the long term, the board may consider providing less than full indexing sooner, rather than continuing full indexing in the short-term and then suddenly and dramatically reducing it. This spreads the indexing available over the long term so that current and future retired members receive some level of inflation protection on an equitable basis.

For non-pension post-retirement group benefits, the funding policy sets a maximum amount (currently one per cent of active member payroll) that is available each year. The board cannot spend more than the one per cent, and can only use employer contributions to pay for these benefits.

The funding policy is a fundamental principle of our ongoing assessment of the financial health of the pension plan.

Administration	**0.10%**	0.10%	0.11%	0.12%	0.12%

* External investment management costs incurred in the investment pooled funds by wholly owned corporations of $1.9 million (2005-$1.1 million; 2004-$0.6 million; 2003-$0.5 million; 2002-$0.7 million) are not included in investment and administration costs, but are included in investment management costs as a percentage of net assets.

** Pension benefits for 2002 include a one time lump sum payment of $2.6 million made to pensioners as a distribution of surplus.

Net Assets Available for Benefits

The plan rules set up a financial structure of two accounts which hold assets. The basic account serves to pay the guaranteed (defined) pension benefits. The inflation adjustment account provides a non-guaranteed cost-of-living supplement to the extent that funds are sufficient.

The following bar chart shows a five-year comparison of net assets in the basic and inflation accounts.

COLLEGE PENSION PLAN

ADMINISTRATIVE AGENT'S RESPONSIBILITY FOR FINANCIAL REPORTING

The financial statements of the College Pension Plan (Plan) were prepared by the British Columbia Pension Corporation (Pension Corporation), the administrative agent for the College Pension Board of Trustees (Board) of the Plan. The Board is responsible for having annual financial statements prepared in accordance with generally accepted accounting principles. The Pension Corporation prepares the financial statements on the Board's behalf and is responsible for the integrity and fairness of the data presented, including significant accounting judgements and estimates. This responsibility includes selecting appropriate accounting policies consistent with generally accepted accounting principles in Canada. Other financial information contained in the College Pension Plan Annual Report conforms to these financial statements.

In discharging its responsibility for the integrity and fairness of the financial statements, the Pension Corporation maintains the internal controls necessary to provide reasonable assurance that relevant and reliable financial information is produced and that assets are properly safeguarded.

The firm of Eckler Partners Ltd. has been appointed the independent consulting actuary to the Plan by the Board. The role of the actuary is to complete an actuarial valuation of the Plan in accordance with accepted actuarial practice; the results of the valuation are included in the financial statements.

The firm of KPMG LLP has been appointed the independent auditor to the Plan by the Board. The role of the auditor is to perform an independent audit of the financial statements of the Plan in accordance with Canadian generally accepted auditing standards. The resulting audit opinion is set out in the Auditors' Report attached to these financial statements.

AUDITORS' REPORT

To the Members of the College Pension Plan

We have audited the statement of net assets available for benefits of the College Pension Plan as at August 31, 2006 and the statement of changes in net assets available for benefits for the year then ended. These financial statements are the responsibility of the board of trustees. Our responsibility is to express an opinion on these financial statements based on our audit.

We conducted our audit in accordance with Canadian generally accepted auditing standards. Those standards require that we plan and perform an audit to obtain reasonable assurance whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation.

In our opinion, these financial statements present fairly, in all material respects, the financial position of the Plan as at August 31, 2006 and the results of its operations and changes therein for the year then ended in accordance with Canadian generally accepted accounting principles.

COLLEGE PENSION PLAN
NOTES TO THE FINANCIAL STATEMENTS
FOR THE YEAR ENDED AUGUST 31, 2006

1. DESCRIPTION OF THE COLLEGE PENSION PLAN

The College Pension Plan (Plan) is a jointly trusteed pension plan governed by Schedule A of the *Public Sector Pension Plans Act* (Act) and the College Pension Plan Regulation (the "pension plan rules"). Joint trusteeship was established effective April 1, 2000 with the agreement of the Provincial Government, the Post Secondary Employers' Association, the College Institute Educators' Association of B.C. (now the Federation of Post Secondary Educators of B.C.) and the B.C. Government and Service Employees' Union (Partners).

Schedule A of the Act describes the composition, appointment, powers, functions and duties of the College Pension Board of Trustees (Board) and provides authority for the Board to make Plan rules. The following brief description of the Plan is provided for general information only. For more information refer to the Act and the Regulation.

a) General

The Plan is for senior administrative employees and faculty members of British Columbia colleges. For employees hired on or after September 1, 1999, all full-time and some part-time senior administrative employees and faculty are required to participate; certain part time staff may do so voluntarily.

b) Roles and Responsibilities

The Board of Trustees
The Partners are responsible for directing amendments to the Plan, if certain conditions are met, and for resolving trustee disputes. The Board consists of up to eleven members. The Partners appoint ten members representing Plan members and Plan employers. The other trustees appoint the eleventh member, the chair. The Board is fully responsible for the management of the Plan, including the investment of the assets and the administration of the Plan. The Board may amend the Plan rules as long as changes can be funded by pension fund surpluses or are cost-neutral to the Plan. Unless required to ensure compliance with regulatory enactments applicable to the Plan, Plan rule changes that result in contribution rate changes can only be initiated by the Partners.

British Columbia Pension Corporation (Pension Corporation)
The Pension Corporation provides benefit administration services as an agent of the Board.

British Columbia Investment Management Corporation (bcIMC)
bcIMC provides investment management services as an agent of the Board.

COLLEGE PENSION PLAN
NOTES TO THE FINANCIAL STATEMENTS
FOR THE YEAR ENDED AUGUST 31, 2006

1. DESCRIPTION OF THE COLLEGE PENSION PLAN (continued)

c) Contributions

Basic Account
Members contribute to the Basic Account 6.86% of salaries up to and including the Canada Pension Plan Year's Maximum Pensionable Earnings (YMPE) ($42,100 in 2006) and 7.61% of salaries over the YMPE, less amounts allocated to the Supplemental Benefits Account (Notes 5 & 10).

Employer contributions to the Basic Account match those for members, less amounts allocated to the Supplemental Benefits Account (Notes 5 & 10).

Inflation Adjustment Account and Supplemental Benefits Account
Members contribute 1.09% of salaries to the Inflation Adjustment Account (IAA). Employers contribute 1.09% of salaries to the IAA less amounts allocated to the Supplemental Benefits Account (Note 5 & Note 10).

d) Pension Benefits

All members are eligible for a pension benefit.

Members are eligible for unreduced pension benefits:

- at age 65;
- at age 60, with at least 2 years contributory service; or
- at age 55 or older, with at least 35 years of contributory service.

Other retiring members have a reduction formula applied to their pensions.

The defined basic plan benefit is integrated with the Canada Pension Plan (CPP). As a result, the Plan provides an unreduced benefit of 1.7% of pensionable earnings up to the YMPE, and 2% of pensionable earnings over the YMPE, for each year of pensionable service (to a maximum of 35 years). Pensionable earnings are based on the member's highest five-year average salary (HAS).

The Plan also provides a bridge benefit payable to age 65 (or the date of death, if earlier). The bridge benefit is 0.3% of the lesser of YMPE or HAS.

Increases to pension payments may be provided each January 1 in accordance with the indexing provisions of the Plan. These increases are based on the annual increase in the Canada Consumer Price Index (CPI) as at the previous September 30, subject to availability of funds in the Inflation Adjustment Account (Note 6 and Note 7b).

At January 1, 2006 retired members received a full CPI increase of 3.4% (2005: 1.8%).

COLLEGE PENSION PLAN
NOTES TO THE FINANCIAL STATEMENTS
FOR THE YEAR ENDED AUGUST 31, 2006

1. DESCRIPTION OF THE COLLEGE PENSION PLAN (continued)

e) Termination and Portability Benefits

A terminating member, who is eligible for a pension but has not yet reached the earliest retirement age, may choose:

- a deferred pension; or
- a transfer of the commuted value of the pension benefit (the minimum value is the member's contributions with interest) to a locked-in registered retirement savings plan or similar tax-sheltered plan.

A terminating member may also choose to leave monies on deposit in anticipation of future entitlements or if under 60 with less than two years of contributory service, may choose a refund of contributions with interest.

Where there are portability arrangements between the Plan and other pension plans, members may be able to transfer certain pension rights.

f) Other Benefits

Disability and survivor benefits are also available under the Plan. Supplemental benefits (Note 10) may also be funded from the Supplemental Benefits Account. Under certain circumstances, members may also reinstate or purchase additional service to increase their future pension benefits.

g) Income Taxes

The Plan is a Registered Pension Plan (RPP) as defined in the *Income Tax Act* (Canada), except for any supplemental benefits (Note 10) which are funded in addition to the RPP. The Plan is not subject to income taxes.

2. SIGNIFICANT ACCOUNTING POLICIES

a) Basis of Presentation

These financial statements are prepared on the going concern basis and present the Plan as a separate financial reporting entity, independent of the Plan's contributing employers and members, and independent of any associated retired member group benefit plans. The Statement of Net Assets Available for Benefits shows the assets under control of the trustees of the Plan. It does not purport to show whether these assets are adequate to meet all the obligations of the Plan. The actuarial valuation of the basic account for funding purposes is included in Note 7.

Certain comparative figures have been reclassified to conform to the current year's presentation.

COLLEGE PENSION PLAN
NOTES TO THE FINANCIAL STATEMENTS
FOR THE YEAR ENDED AUGUST 31, 2006

2. SIGNIFICANT ACCOUNTING POLICIES (continued)

b) Investments

Investments are stated at fair value and consist primarily of direct ownership in units of pooled investment portfolios. The units of pooled investment portfolios are valued regularly based on the value of the underlying assets. Where available, fair values of these assets are based on public market prices or quotations from investment dealers. Where public market prices or quotations are not available, fair values are derived using valuation methods such as discounted cash flows, earnings multiples, appraisals, prevailing market rates for instruments with similar characteristics and other pricing models, as appropriate. The fair value of derivative contracts is included in the fair value of pooled investment portfolios.

Investment purchases and sales are recorded on the trade date (the date upon which the substantial risks and rewards of ownership have been transferred).

c) Investment Income

Income from investments is recorded on the accrual basis and represents pooled investment portfolio income attributable to the Plan as a unit holder. The current period change in fair value includes realized and unrealized gains and losses which are included in investment income.

Within the pools, dividends are accrued on the ex-dividend date. Income and expenses from derivative contracts are recognized on the accrual basis. Gains and losses on derivative instruments are recognized concurrently with changes in their fair values.

d) Use of Estimates

The preparation of financial statements, in conformity with Canadian generally accepted accounting principles requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of increases and decreases in assets during the period. Significant areas requiring the use of management estimates relate to the valuation of investments and the estimate of the actuarial position of the Basic Account. Actual results could differ from those estimates.

COLLEGE PENSION PLAN
NOTES TO THE FINANCIAL STATEMENTS
FOR THE YEAR ENDED AUGUST 31, 2006

3. INVESTMENTS (FAIR VALUE)

	2006			2005
	Basic Account	Inflation Adjustment Account	Total	Total
	($ Thousands)			
Short-term	$ 88,994	$ 13,354	$ 102,348	$ 31,790
Canadian Bonds	486,287	67,574	553,861	542,943
Canadian Equities	270,935	39,639	310,574	394,254
U.S. Equities	286,982	41,905	328,887	297,429
International Equities	340,736	51,257	391,993	297,879
Foreign Currency	3,354	516	3,870	3,182
Mortgages	69,027	10,098	79,125	71,206
Real Estate	217,147	31,457	248,604	197,876
Private Placements	56,484	11,462	67,946	42,199
	$ 1,819,946	$ 267,262	$ 2,087,208	$ 1,878,758

Plan investments consist primarily of direct ownership in units of pooled investment portfolios managed by bcIMC. Each unit gives the holder a proportionate share in the net assets of the pooled investment fund. One or more pooled investment portfolios exist for different types of investments, such as short-term investments, Canadian bonds and Canadian equities.

Short-term investments consist of Canadian and U.S. money market securities, such as treasury bills, with maturities of 15 months or less, and short-term bonds with one to five year terms. Canadian bonds consist of government and corporate bonds and debentures. Equities consist primarily of publicly traded shares and, in the case of international equities, refer to investments in Europe, Australia and the Far East. The foreign currency pooled fund engages in the buying and selling of foreign currency financial instruments to enhance returns through the active management of foreign currency exposure.

Mortgages consist mainly of Canadian construction, commercial and multi-family residential mortgages. Real estate investments consist mainly of diversified Canadian income-producing properties. Private placements refer to Canadian and international long-term debt or equity investments made outside the structure of public markets (Note 11).

The mortgages are secured by real estate and are valued using current market yields. Real estate investments are valued quarterly by bcIMC's external real estate investment managers and, at least once every ten to eighteen months, by accredited independent appraisers to establish current market values. Private placements are valued annually based on audited financial statements from private placement external managers.

COLLEGE PENSION PLAN
NOTES TO THE FINANCIAL STATEMENTS
FOR THE YEAR ENDED AUGUST 31, 2006

3. INVESTMENTS (FAIR VALUE) (continued)

The Plan also uses derivative contracts held indirectly through various pooled investment portfolios to enhance return, manage exposure to interest rate and foreign currency risk, and for asset mix management purposes. Derivative contracts are financial contracts, the value of which is derived from the value of underlying assets, indices, interest rates, or exchange rates.

Basic Account Canadian bonds of $1.6 million (2005: $1.6 million) are being held in a collateral account for a future investment opportunity (Note 11).

4. INVESTMENT INCOME

Excess Interest	-	-	-	-
	$ 16,977	$ (16,977)	$ 7,702	$ (7,702)

COLLEGE PENSION PLAN
NOTES TO THE FINANCIAL STATEMENTS
FOR THE YEAR ENDED AUGUST 31, 2006

6. ACCOUNT TRANSFERS (continued)

The Inflation Adjustment Account (IAA) is a separate account that is maintained for funding current and future indexing supplements. The IAA is funded through a portion of ongoing contributions from employers and members (Note 1c), from investment income earned on its own assets, and from excess interest earned in the Basic Account.

All pension payments are made from the Basic Account. Each year, when members' pension payments are adjusted for current indexing, monies are transferred from the IAA to the Basic Account to cover the present value of all future payments arising from the current indexing supplements.

When a deferred pension begins to be paid, the present value of the cost of living changes during the deferral period is transferred from the IAA to the Basic Account.

There have been no excess interest transfers to the IAA for the years ended August 31, 2002 through 2006. Excess interest is based on investment income earned on Basic Account assets required for pensions currently being paid, approximately $542 million of assets for 2006 (2005: $464 million). The excess interest rate of return is determined by taking the difference between the actual five-year annualized market rate of return (7.6%) and the rate of return used by the actuary (7.2%) in valuing the Plan's liabilities. The calculated excess interest rate of return for 2006 was 0.4% (2005: - 3.4%). The cumulative negative excess amount of $36.8 million will be offset against future positive excess interest amounts before positive excess interest transfers will resume.

	2006	2005
	($ Millions)	
Cumulative negative excess interest, beginning of year	$ (36.2)	$ (19.7)
Interest applied to beginning of year amount	(2.8)	(0.7)
Current year (negative) excess interest	2.2	(15.8)
Cumulative negative excess interest, end of year	$ (36.8)	$ (36.2)

7. ACTUARIAL VALUATION OF THE BASIC ACCOUNT FOR FUNDING PURPOSES

a) Basic Account

An actuarial valuation of the Plan's assets and pension obligations is performed at least every three years by an independent actuary to determine an appropriate combined employer and member contribution rate to fund the Basic Account. For this purpose, the Plan's actuary values both accrued assets and accrued benefit obligations to the financial statement date, and contributions and benefits for future service. The actuary's calculated contribution rate is based on the entry-age method. This method produces the level rate of member and employer contributions sufficient to provide benefits for the average future new entrants to the Plan.

COLLEGE PENSION PLAN
NOTES TO THE FINANCIAL STATEMENTS
FOR THE YEAR ENDED AUGUST 31, 2006

7. ACTUARIAL VALUATION OF THE BASIC ACCOUNT FOR FUNDING PURPOSES (continued)

a) Basic Account (continued)

The most recent full valuation for funding purposes was prepared as at August 31, 2003. The valuation disclosed an unfunded actuarial liability (UAL) for basic pension benefits of $50 million (2000: $120 million surplus, adjusted to $87 million surplus as result of subsequent benefit improvements) assuming future contributions at rates in effect at the valuation date, and including the future scheduled rate changes.

The following long-term actuarial assumptions were used:

- annual investment return 7.2%
- annual salary escalation rate 4.7%

The next full valuation will be as at August 31, 2006, with results available for the August 31, 2007 financial statements.

b) Inflation Adjustment Account (IAA)

No unfunded liability exists for the IAA, since the obligation for future indexing benefits is limited to the amount of the available assets in the account. As indexing is granted to retired members, full funding for that granted indexing, on a net present value basis, is transferred from the IAA to the Basic Account, from which the pensions are paid. There is no minimum level of indexing required to be paid under the Plan rules, nor is there any Plan provision to fund the IAA to any minimum level of future potential indexing.

The Board monitors the performance of the IAA and, at least annually, reviews a sensitivity analysis of the projected impact on the IAA of possible differing future economic trends. Such factors include inflation rates, real wage growth rates, real investment rates of return and group health benefit costs. This sensitivity analysis assists the Board to identify scenarios some years in advance of their possible occurrence, and if it appears that full indexing cannot be provided for at least the next 20 years, the Board may consider providing less than full indexing sooner. As long as there are contributions to the IAA, there will be some measure of indexing protection for retired members.

8. ACTUARIAL VALUATION OF THE BASIC ACCOUNT FOR ACCOUNTING PURPOSES

An actuarial valuation is performed at least every three years. Its primary objective is to assess the financial position and adequacy of funding for the Basic Account of the Plan as described in Note 7a. As part of the actuarial valuation, the actuary also calculates values, for accounting purposes, for Basic Account assets as at, and pension liabilities accrued to, the financial statement date.

COLLEGE PENSION PLAN
NOTES TO THE FINANCIAL STATEMENTS
FOR THE YEAR ENDED AUGUST 31, 2006

8. ACTUARIAL VALUATION OF THE BASIC ACCOUNT FOR ACCOUNTING PURPOSES (continued)

For this purpose, contributions and benefits for future service are not included, in contrast to their inclusion in the valuation for funding purposes as described in Note 7a.

The Basic Account is the account from which the defined basic benefits of the Plan are paid. It is also the account from which any indexing that has been granted to retired members is paid. Future indexing benefits are not guaranteed within the Plan provisions and are granted to retired members only to the extent that sufficient assets are available from the IAA to fund those benefits. As indexing is granted, the Basic Account receives from the IAA the present value funding necessary for the indexing granted. Therefore accrued basic pension benefits for valuation purposes includes the liability for all indexing granted to the date of the valuation, but not for as yet unknown future indexing.

The latest full valuation was made as at August 31, 2003 by Eckler Partners Ltd. The results were as follows:

As at August 31	2003	2000
	($ Millions)	
Net assets available for basic pension benefits	$ 1,235	$ 1,166
Five year market value smoothing adjustment	81	(181)
Net actuarial assets for basic pension benefits	1,316	985
Liability for accrued basic pension benefits	1,194	723
Actuarial Surplus	$ 122	$ 262

The next full actuarial valuation will be at August 31, 2006 for inclusion in the August 31, 2007 financial statements.

The liability for accrued basic pension benefits at the valuation date is determined using the projected benefit method prorated on service. Net assets are valued using five-year market value smoothing. For accounting purposes, an estimate of the actuarial position between valuations is required. This estimate, called an extrapolation, has been made to August 31, 2006, using the following long-term actuarial assumptions:

- annual investment return 7.2%
- annual salary escalation rate 4.7%

COLLEGE PENSION PLAN
NOTES TO THE FINANCIAL STATEMENTS
FOR THE YEAR ENDED AUGUST 31, 2006

8. ACTUARIAL VALUATION OF THE BASIC ACCOUNT FOR ACCOUNTING PURPOSES (continued)

On this basis, the extrapolated value of the surplus at August 31, 2006 is as follows:

Extrapolated Actuarial Assets Available for Basic Pension Benefits
As at August 31

	2006	2005
	($ Millions)	
Extrapolated actuarial assets, beginning of year	$ 1,579	$ 1,436
Account transfers	17	8
Current year contributions	77	78
Net transfers from (to) other plans	7	5
Pension, termination and refund benefits	(61)	(53)
Interest accrued on assets	115	105
Extrapolated actuarial assets, end of year	$ 1,734	$ 1,579

Extrapolated Actuarial Liability for Accrued Basic Pension Benefits
As at August 31

Extrapolated liability for accrued basic pension benefits, beginning of year	$ 1,465	$ 1,328
Account transfers	17	8
Current period benefit cost	79	80
Net transfers from (to) other plans	7	5
Pension, termination and refund benefits	(61)	(53)
Interest accrued on liability	107	97
Extrapolated liability for accrued basic pension benefits, end of year	$ 1,614	$ 1,465
Extrapolated Actuarial Surplus, August 31	$ 120	$ 114
Fair value of Basic Account net assets available for benefits	$ 1,822	$ 1,626
Fair value changes not reflected in extrapolated actuarial value of net assets	(88)	(47)
Extrapolated actuarial value of net assets available for benefits	$ 1,734	$ 1,579

Extrapolations may not be reliable indicators of the next valuation results, nor do they necessarily reflect the overall trend of results. Between valuations, actual wage increases, investment earnings and the incidence of retirements, withdrawals, etc. may vary significantly from the long-term assumptions used in the extrapolation.

No unfunded liability exists for the LAA, since the obligation for future indexing benefits is limited to the amount of the available assets in the account.

COLLEGE PENSION PLAN
NOTES TO THE FINANCIAL STATEMENTS
FOR THE YEAR ENDED AUGUST 31, 2006

9. INVESTMENT AND ADMINISTRATION COSTS

	2006	2005
	($ Thousands)	
Investment Management	$ 2,236	$ 1,807
Benefit Administration	1,539	1,377
Board Remuneration and Expenses	155	145
Board Secretariat Costs	190	163
Other Professional Services	184	252
	$ 4,304	$ 3,744

bcIMC and the Pension Corporation are related parties to the Plan. The Board appoints members to each of the respective corporate boards.

Costs for investment management services charged by bcIMC include costs for recovery of its internal and external investment management fees, except those external management fees related to corporations wholly owned by the investment pooled funds.

Investment management costs of $1.9 million (2005: $1.1 million), representing the external management costs incurred by wholly owned corporations of the investment pooled funds, are not included in the above amount.

Benefit administration costs represents amounts charged to recover benefit administration costs incurred by the Pension Corporation. These costs are approved by the Board. Included in accounts payable is $120 thousand (2005: $110 thousand) due to the Pension Corporation for those costs.

These transactions are in the normal course of operations and are measured at the exchange amount of consideration established and agreed to by the related parties.

Board secretariat costs represent amounts for staffing and other costs associated with Board support.

Other professional service costs include actuarial, insurance, audit and legal fees.

10. SUPPLEMENTAL BENEFITS ACCOUNT

The Supplemental Benefits Account is the account through which certain supplemental benefits are funded. For example, pension benefits which exceed the *Income Tax Act* (Canada) limits for registered pension plans are paid through this account. Certain group benefit coverage may also be provided for retired members through this account. The availability, type and level of retired member group benefit coverage are contingent upon the availability of funding for such benefits.

COLLEGE PENSION PLAN
NOTES TO THE FINANCIAL STATEMENTS
FOR THE YEAR ENDED AUGUST 31, 2006

10. SUPPLEMENTAL BENEFITS ACCOUNT (continued)

To the extent that group benefits are funded from the Supplemental Benefits Account, they are funded from current contributions that would otherwise be employer inflation contributions and cannot exceed 1% of pensionable salaries. Currently this represents approximately 91.7% of contributions that would otherwise be employer inflation contributions. Retired member group benefit costs (shown on the Statement of Changes in Net Assets Available for Benefits) represent group benefit costs paid by the Plan, less any premiums paid by retired members.

11. COMMITMENTS

The Plan participates in private placement and international real estate pools that are managed by bcIMC. As at August 31, 2006, the Plan's share of commitments (over the next several years) for future investment contracts in these pools is approximately $103.5 million (2005: $52.9 million).

In July 2005, bcIMC established a collateral account pledged as security for a future investment opportunity that will not be funded until 2009. As at August 31, 2006, $1.6 million of Basic Account Canadian bonds are being held as collateral for an investment commitment of $1.4 million.

12. FINANCIAL INSTRUMENTS

The Plan's investments are recorded at fair value. Other financial instruments consist of cash, accounts receivable, accounts payable, and accrued expenses. The fair values of these financial instruments approximate their carrying values.

Fair values of investments are exposed to price risk and credit risk. Price risk is comprised of foreign currency risk, interest rate risk, and market risk. Foreign currency risk relates to the possibility that the investments will change in value due to future fluctuations in foreign exchange rates. Interest rate risk relates to the possibility that the investments will change in value due to future fluctuations in market interest rates. Market risk relates to the possibility that the investments will change in value due to future fluctuations in market prices. Credit risk relates to the possibility that a loss may occur from the failure of another party to perform according to the terms of a contract.

Foreign Currency Risk

Foreign currency exposure arises from the Plan's holdings of foreign currency denominated investments and related derivative contracts. Foreign currency forward contracts are used to manage a portion of the currency exposure. A foreign currency forward contract is a contractual obligation either to buy or sell a specified amount of foreign currency at a predetermined future date and exchange rate.

COLLEGE PENSION PLAN
NOTES TO THE FINANCIAL STATEMENTS
FOR THE YEAR ENDED AUGUST 31, 2006

12. FINANCIAL INSTRUMENTS (continued)

Interest Rate Risk

The value of the Plan's assets is affected by changes in interest rates and their effect on capital markets. Actuarial liabilities are affected by changes in long-term market interest rates.

Market Risk

The Board approves the long-term asset mix policy for investment assets and oversees the management of these assets through the Board's investment management agent, bcIMC. Market risk is reduced through asset class diversification, diversification within each asset class and credit quality constraints on fixed income instruments.

Credit Risk

The Plan limits derivative contract credit risk by dealing principally with counterparties that have a credit rating of A or higher as rated by the Dominion Bond Rating Service or equivalent.
